Lovely Professional University

MBA in Business Analytics

2022 – 2024

Jalandhar, Punjab

Technical Skills, Certifications

Data Science & ML: Machine Learning (Regression, Classification), Time-Series Forecasting, Marketing Mix Modeling (MMM), Deep Learning, NLP, Computer Vision (OpenCV, YOLOv8), LLMs, Agentic AI, RAG.

Programming & Querying: SQL, Python(Pandas, NumPy, SciPy, Pytorch, Tensorflow, Matplotlib, Seaborn), REST APIs, Data Transformation.

Data Visualization & BI: Power BI, Tableau, Advanced Excel (VBA/Macros), Automated Reporting.

Cloud & Automation: Microsoft Power Platform (Power Apps, Power Automate), SharePoint, CoPilot Studio

Statistical Methods: Hypothesis Testing, Correlation/Regression Analysis, Exploratory Data Analysis (EDA), Feature Engineering, A/B Testing.

Certifications: PL-900: Microsoft Power Platform Fundamentals by Microsoft, Complete Generative AI Course by Udemy, Analytical Excel Certification Program by Grant Thornton

Experience

Protics Research

Sept 2025- Present

Data Analyst

Sarita Vihar, New Delhi

- Analyzed market research datasets using SQL and Python, improving insight accuracy by 20%.
- Designed and executed quantitative research analysis on 20+ datasets, automating data cleaning and statistical evaluation to deliver high-quality insights across 5 industry domains.
- Prepared data processing and reporting workflows using Python, reducing manual effort by 40% and increasing efficiency.
- Applied advanced statistical techniques (correlation, regression, hypothesis testing) across 15+ client studies, identifying key drivers that boosted client retention strategies by 12%.

Course 5 Intelligence Ltd

Aug 2024 – Sept 2025

Analyst

Coimbatore, Tamil Nadu

- Engineered and processed large datasets (500K+ records) in Excel and trained OLS regression models in Python for predictive analytics, improving model accuracy by 18% through advanced feature engineering and validation techniques.
- Organised and implemented a real-time Marketing Mix Attribution model for 2 CPG clients/brands, achieving a 25% uplift in marketing ROI measurement; presented actionable insights to stakeholders to drive strategic decision-making.
- Designed and delivered Power Apps solutions that Analyzed workflow efficiency by 35% and supported faster decision-making, contributing to an 8% rise in operational revenue.

Projects

Marketing Mix Modeling (MMM)

- Created an MMM model in Python using OLS regression across 500K+ ad spend across 5 marketing channels to evaluate channel contribution.
- Performed data preprocessing, feature engineering, and multicollinearity checks (VIF) to improve model robustness.
- Evaluated and benchmarked model performance using R^2 , MAPE, and residual diagnostics, achieving an R^2 of 0.85 and reducing error margins by 15%.
- Improved budget allocation efficiency by 25% and campaign ROI by 12% through optimization recommendations.

Vehicle Detection and Tracking System — Python, YOLOv8, OpenCV

- Built a YOLOv8-based computer vision system to detect and classify vehicles from 10K images and video frames, supporting automated visual analysis.
- Processed and annotated 10K+ vehicle images, applying preprocessing and augmentation techniques to improve model generalization and detection performance.
- Trained and fine-tuned the YOLOv8 model through 10+ training epochs and hyperparameter optimization to improve vehicle detection accuracy.

Enterprise RAG AI Assistant — Python, LangChain, Azure OpenAI, Azure AI Search, Streamlit

- Developed an end-to-end Generative AI and RAG application using Python, LangChain, Azure OpenAI, and Azure AI Search for enterprise document question answering.
- Executed document ingestion, preprocessing, chunking, and embedding pipelines using text-embedding-3-large for semantic and vector-based retrieval.
- Implemented vector/semantic search and context retrieval with Azure AI Search, integrating retrieved context with GPT-4o for grounded responses.
- Applied prompt engineering and context optimization and developed a Streamlit interface for natural-language querying of enterprise documents.
